

Supplementary Material

Table i. Intraclass correlation coefficient of inter- and intra- observer reliability in sagittal spino-pelvic alignment parameters

	Inter-observer reliability	Intra-observer reliability
SS	0.917	0.815
PT	0.891	0.840
PI	0.864	0.895
LL	0.812	0.934
SSA	0.870	0.821
C7T	0.861	0.911
SFA	0.812	0.842
PFA	0.917	0.876
FI	0.893	0.915

Images from 30 patients were randomly selected for the inter- and intra-observer reliability analysis
